PROFESSIONAL SUMMARY

Full-stack developer with internship experience building scalable AI-powered web and mobile applications using React.js, Python, Node.js, and modern cloud technologies. Experienced in developing intelligent systems with LLM integration, REST APIs, static code analysis, and real-time workflows. Skilled in Microsoft Power Platform, full-stack engineering, and AI-assisted software solutions. Passionate about building scalable, developer-centric platforms and solving real-world engineering challenges.

EXPERIENCE

Software Developer – Intern

Novintix

Dec 2025 – Apr 2026

Coimbatore, Tamil Nadu, India

- Built and maintained full-stack web applications using React.js with Redux for state management on the frontend and Python on the backend, connected to MongoDB for data storage and a Starlet-based admin dashboard for internal management.
- Developed and customised the Starlet admin panel to manage application data, streamlining internal operations and reducing manual data handling for the team.
- Transitioned to Microsoft Power Platform — designed canvas apps using Power Apps, automated business workflows with Power Automate, and built interactive Power BI dashboards, reducing manual reporting effort by approximately 60%.

Skills used: React.js, Redux, Python, MongoDB, Starlet, Power Apps, Power Automate, Power BI, Git, Jira, Fast APIs

Junior Software Engineer – Intern

Xyloite Technologies

July 2024 – Dec 2024

Coimbatore, Tamil Nadu, India

- Completed a hands-on internship focused on React Native mobile application development and REST API integration, contributing to 9+ dynamic app screens across the project lifecycle.
- Developed an AI chatbot using Ollama and open-source LLMs, integrating it into the mobile app to handle real-time user queries with improved response accuracy.
- Honored as Performer of the Month (August 2024) for independently leading real-time IT tasks and demonstrating strong cross-functional team collaboration.

Skills used: React Native, Ollama, REST APIs, JavaScript, TypeScript, Git, Agile/Scrum, Frappe, Postman, RAG, Faiss DB

PROJECTS

- Sniff-AI – AI-Powered Intelligent Code Review Platform** *AI/Software | React.js, Next.js, FastAPI, Python, MongoDB, OpenAI, AST*
 - Developed an intelligent code review platform that detects code smells, logic flaws, hallucinated APIs, and security issues using AI-assisted semantic analysis and static validation.
 - Designed a scalable analysis workflow with AI fingerprint detection, severity-based reporting, test coverage estimation, and exportable review reports for developer-focused code auditing.
- Cortex – Local-First RAG Knowledge Base for Developers** *AI/Software | React.js, FastAPI, Python, LangChain, FAISS, Ollama*
 - Built a fully offline developer knowledge base that captures code snippets and notes, embeds them locally via Ollama, and indexes them in FAISS for semantic search beyond exact keyword matching.
 - Designed a code-aware chunking pipeline and a LangChain-orchestrated retrieval-augmented generation (RAG) chain to enable conversational Q&A over personal technical knowledge, with zero cloud dependency.

SKILLS

Languages	: Python, C, TypeScript, JavaScript, HTML, CSS
Frameworks	: React.js, Redux, React Native, Next.js, Node.js, Express.js, FastAPI, Flask, Tailwind CSS
AI / LLM	: OpenAI APIs, Ollama, LangChain, FAISS, LLM Integration, Prompt Engineering, AST Parsing, Static Code Analysis
Power Platform	: Power Apps (Canvas & Model-Driven), Power Automate (Flows, RPA), Power BI (Dashboards, DAX, Data Modelling)
Databases	: SQL Server, MongoDB, Oracle
Tools	: Git, GitHub, VS Code, Jira, Docker, Postman, Vercel, Render, MongoDB Atlas
Soft Skills	: Communication, Problem Solving, Team Collaboration, Decision-Making, Agile/Scrum

EDUCATION

Coimbatore Institute of Technology, Coimbatore, Tamil Nadu

M.Sc Decision and Computing Sciences

CGPA: 7.45 / 10

Nov 2021 – April 2026

CERTIFICATIONS

- Prompt Engineering for LLMs – Udemy** – Completed a comprehensive course covering advanced prompt engineering techniques, Retrieval-Augmented Generation (RAG), prompt structuring, and real-world AI solution design.
- Introduction to Generative AI – Google Cloud Skills Boost** – Completed foundational training on generative AI concepts, transformer architectures, LLM applications, and AI-assisted software workflows.

ACHIEVEMENTS

- 1st Prize – IMpathon Hackathon (Sona College of Technology)** – Secured 1st place in a 30-hour nonstop hackathon by developing an R-CNN-based deep learning model for real-time object detection, competing against 50+ teams.
- Global Rank 6914 – TCS CodeVita Season 13** – Secured a global rank of 6914 in TCS CodeVita Season 13, a competitive coding contest run by Tata Consultancy Services, for demonstrating strong algorithmic problem-solving and coding skills.
